

HighPoint Technology Solutions, Inc. Emerges as a Market Leader in Higher Education Mobility

HighPoint Mobile Achieves Oracle Validated Integration with Oracle's PeopleSoft Enterprise Campus Solutions 9.0

August 10, 2011 – HighPoint Technology Solutions, Inc., a Gold-level member of Oracle PartnerNetwork (OPN), today announced it has achieved Oracle Validated Integration of HighPoint Mobile with Oracle's PeopleSoft Enterprise Campus Solutions Version 9.0. HighPoint Mobile complements the services that Higher Education customers can provide their constituents by providing their students, faculty, administrators, and parents with the ability to immediately obtain and process important student, faculty, and campus information through their smart phones and mobile devices. With the open mobile framework and out-of-the-box integration to Oracle PeopleSoft Campus Solutions, HighPoint has integrated the main student and faculty information and created a light-weight, fast and easy way for customers to view important information from the Oracle PeopleSoft Campus Solutions system. Mark Armstrong, Vice President of Oracle Higher Education Product Development said, "HighPoint Mobile with Oracle's PeopleSoft Campus Solutions can offer customers the flexibility to extend their investment in our products to the mobile cloud. HighPoint is emerging as a market leader for mobility integration to Oracle's PeopleSoft Enterprise Campus Solutions Version 9.0."

Southeastern Louisiana University recently deployed HighPoint Mobile for Oracle PeopleSoft Campus Solutions across the University. The Southeastern Louisiana University Chief Information Officer Dr. Mike Asoodeh said, "The technology employed by HighPoint is made for PeopleSoft."

Southeastern, a 15,000-student state university in Hammond, Louisiana, had previously developed an in-house "app" for iPhone users that was met with considerable enthusiasm. When the opportunity came available to use HighPoint Mobile to augment Southeastern's student services to the same and other kinds of "smart" devices, University officials heartily embraced it.

"We recognized the growing demand for this kind of service," Asoodeh said. "Our students have grown up on video games and the Web, and they expect to be able to transact business and communicate via their mobile phones and other Web-linked devices. This is the number one technology project for the university as we move into enterprise document and content management. Few universities are doing this right now; in fact, others are looking at what we're doing because this is truly innovative."

The features delivered with HighPoint Mobile include important self-service functions in the following Oracle PeopleSoft Campus Solutions modules: Admissions, Campus Community, Student Records, Student Financials, Financial Aid, and Campus Self-Service.

The key features and benefits include:

- Out-of-the-box Integration with Oracle's PeopleSoft Enterprise Campus Solutions
- Student Self-Service Functionality
- Faculty/Administration Self-Service Functionality
- User Friendly Configuration
- Guest/Parent Access
- Social Networking Features

About Oracle Validated Integration

Oracle Validated Integration through the Oracle PartnerNetwork gives customers confidence that the integration of complementary partner software products with Oracle Applications and Oracle Technology (including Oracle Enterprise Manager, Oracle Content Management, and Oracle Identity Management) have been validated and the products work together as designed. This can help reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review the integrations of third-party software to Oracle Applications and Technology products, including productized repeatable integrations from system integrators. Oracle provides access to Oracle Applications and Technology software, tools, technical resources and training to assist partners in developing integrations based on Oracle standards and best practices. Partners who have successfully validated their integrations are authorized to use the "Oracle Validated Integration" logo. For more information, please visit [Oracle.com](http://www.oracle.com) at

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more, visit <http://www.oracle.com/partners>.

About HighPoint Technology Solutions, Inc.

HighPoint Technology Solutions, Inc. is a leader in mobile technology and social media solutions for PeopleSoft. HighPoint Mobile is integrated out-of-the-box with Oracle PeopleSoft Enterprise Campus Solutions via smart phone and mobile devices such as iPhones, iPads, Android phones, Blackberry phones, and other tablets and mobile devices. HighPoint has extensive experience in the Higher Education industry delivering value-driven solutions that address the evolving needs of Colleges and Universities. At HighPoint, we've assisted many institutions of higher learning to successfully implement and adopt Oracle technology to better enable them to meet and exceed the higher expectations of today's market demands.
